I urge you to oppose a US-Colombia Free Trade Agreement. Colombia continues to have a deplorable human rights record and an FTA would only worsen displacement of rural populations by giving transnational corporations unrestricted access to land and resources. Already, more than four million people have been driven from 25 million acres over ten years. This FTA would hurt manufacturing and agricultural workers in both countries,and would be especially hard on Colombian family and sustainable farmers.

Global corporations like Coca-Cola, Drummond Coal, and Chiquita Banana have been caught paying paramilitary death squads for protection or looking the other way while unionists are murdered on company properties. Colombia needs support for a legitimate peace process with dialogue among all major parties, not an FTA that gives economic rewards for terror and displacement.

NO MORE TERROR AND DISPLACEMENT! NO US-COLOMBIA FTA!

From:_____

More unionists are killed in Colombia than in the rest of the world combined - and that pace has not slowed with the country's new administration. Colombia has over 7,000 political prisoners and over 35,000 people have "disappeared." Colombia has surpassed Sudan as having the largest displaced population in the world! No to free trade!

NO colombia

US free trade AGREEMENT
